

WHY EARLY DETECTION IS IMPORTANT

AUDIO DEPRIVATION

1: The **brain** has **difficulty understanding** and **processing** information due to the **lack of stimulation**.

#2: When the **brain** is **deprived of sound** over time, it **loses** the ability to **process** sound.

USE IT OR
LOSE IT

"Blindness cuts us off from things, but deafness cuts us off from people"
- **Helen Keller**

SELF-CHECK HEARING ASSESSMENT

- 1: Do people seem to speak or mumble more than before?
- 2: Do you feel tired or irritable after a long conversation?
- 3: Do you miss words in a sentence and frequently ask people to repeat themselves?
- 4: Is it difficult to follow a conversation in a group or a crowded restaurant?
- 5: Do you turn up the volume on your TV?
- 6: Do you find it difficult to hear the doorbell or the phone ring?
- 7: Do you find it difficult to hear women and children's voices?

If you said **yes** to **at least 2** of these questions, you **may** have **hearing loss**.

TESTIMONIALS

"GREAT AS USUAL! Absolute Hearing Solutions doesn't charge for any cleaning or overall checking the devices. When I am going to be in the area, I just call and see if I can stop by and have them check it out. I get new filters, blow out of the microphones, new tips. All with a very personal touch. I will never go anyplace else." - Janet from Powell

"Extremely efficient and professional, did an excellent hearing test, identified problems, recommended solutions and helped me make the most cost effective choice." - Geoff from Columbus
