

Your style. Your Alta.

Welcome to the fashion-forward world of Alta. Not only is Alta customized to your hearing preferences, it is also customized to match your personal style. Choose from many designs or custom fittings that suit your lifestyle and hearing abilities. They're all available in colors that match your skin and hair tones, or make a fashionable statement.

Also available in 5 other colors.

Alta is available in these custom styles too:

Completely In Canal

In The Canal

Half Shell

Looks great. Sounds even better.

Alta's remarkable technologies work together, seamlessly and automatically. Every Alta hearing device features Speech Guard E, a breakthrough in clear, transparent sound. Speech Guard works like a shield to protect the clarity of speech, even in noisy background environments.

Our revolutionary Spatial Sound Premium technology allows you to hear in 3-D, so you can better follow conversations that come from different directions in a room. Every Alta hearing device also features Free Focus, which automatically selects the best high performance directional mode for you, and gives you clearer more natural sound, even in difficult hearing situations.

Add ConnectLine™ and let your Alta function as a wireless headset for a wide range of Bluetooth™ enabled devices, such as your TV, telephone, computer, MP3 player and smartphone.

Customized. For your ears only.

We all have our own sound preferences and hearing needs. It all depends on how our brain "hears." Unlike ordinary hearing devices, Alta is designed to accommodate your unique hearing requirements. Your personal hearing preferences are actually used by the powerful sound-processing chip that's at the heart of every Alta hearing solution. Think of it as a micro-brain that works in harmony with your brain to help you differentiate sounds. You'll hear more naturally and with more clarity, even when you're in a noisy restaurant, a group setting or at a large sporting event.

Introducing Alta. The hearing device customized exclusively for you. Your life. Your world.

Your day takes you from one difficult hearing situation to another. Alta by Oticon lets you hear more in all of them.

Alta not only features our most advanced sound-processing architecture ever. It's customized for your personal sound preferences. It works smarter so you don't have to work harder at hearing. Your day is easier, your life is fuller and your world is more complete, because you can hear more. Anywhere. Anytime.

People First

People First is our promise to empower people to communicate freely, interact naturally and participate actively

Hear more. Anywhere. Anytime.
