Phonak Naída B, the 5th generation of the world's most trusted power hearing aid, has been developed for the broad diversity of severe to profound hearing losses. Powered by the innovative technology of the Phonak Belong™ platform, Naída B offers a UP and a SP model in four performance levels and the most feature-rich, rechargeable hearing aid from Phonak: Naída B-R RIC.

Naída B provides fitting flexibility with Adaptive Phonak Digital Contrast, a new slow compression option which increases the envelope cues for speech. It also utilizes dedicated features such as Binaural VoiceStream Technology™ for improved speech understanding and SoundRecover2 for more audibility of high frequency sounds. With the enhanced Roger and directional, listening effort in the near field is significantly reduced.

Naída B partnered with Roger is the solution to address all listening challenges nearby and over distance.

Product description

Naída B-R RIC
(B90/B70/B50)

Push button (Program/Volume)		•
Volume control		
Telecoil		
EasyPhone		•
Direct Audio Input		
Phonak CROS B compatibility		
IP rating		IP68 ¹
Dimensions (L x W x D)		29.7 x 12.9 x 7.9 mm (1.17 x 0.51 x 0.31")
Weight		2.4 g (0.09 oz)
Rechargeable lithium-ion battery life ²	No audio/media streaming	24 h
	5h of audio/media streaming	20 h
	10h of audio/media streaming	16 h
Charging times ³	0% to 100%	3 h
	0% to 80%	1.5 h
	30 min fitting	10 min.

		Standard xReceiver xS	Power xReceiver xP	UltraPower xReceiver xUP
Maximum Power Output (dB SPL)	2 cc coupler	111	124	130
	Ear simulator	122	132	136
	2 cc coupler	46	57	66
	Ear simulator	56	65	72
Frequency range – Ear simulator (Hz)		<100 – 9200	<100 – 6400	<100 – 5800

Fitting range

Mild to moderately-severe hearing loss, all audiometric configurations.

Mild to severe hearing loss, all audiometric configurations.

Moderate to profound hearing loss, all audiometric configurations.

¹ IP68 indicates that the hearing aid is water resistant and dust tight. It survived continuous immersion in 1 meter of water for 60 minutes and 8 hours in a dust chamber as per the IEC60529 standard. No traces of dust were evident within the housing.

² Actual battery life also depends on hearing loss, battery age and sound environment.

³ Actual charge time depends on the remaining battery life, but will not exceed 3 hours.

Key features

Adaptive Phonak Digital Contrast

With the new Adaptive Phonak Digital Contrast fitting formula we introduce a slow compression option. Through longer attack and release times, the spectral contrast, as well as the speech signal modulations are better preserved. This increases the envelope cues for speech compared to Adaptive Phonak Digital, so it is now possible to get closer to the original speech signal and make these lost details in speech more pronounced again. Audiological research shows that this leads to improved vowel recognition for some adults with severe to profound hearing loss.⁶

SoundRecover2

As hearing loss increases, SoundRecover2 improves speech audibility and utilizes an adaptive frequency lowering algorithm. Sound quality of mid and low frequencies are maintained while high-frequency sounds are made audible. This creates an optimal listening experience for more users.

Binaural VoiceStream Technology™

Binaural VoiceStream Technology is the ability of Phonak hearing aids to stream the full audio bandwidth in real-time and bi-directionally for improved sound quality and unmatched speech understanding. This unique technology enables programs and features such as StereoZoom, Speech in Wind, Speech in 360°, and DuoPhone.

Robust and reliable

Thanks to glass fiber reinforced housing material, Naída B is very robust which gives the patient optimal confidence. In addition, the housings are water and dust resistant with an IP68 rating. This indicates that the hearing aid survived continuous immersion in 1 meter of water for 60 minutes and 8 hours in a dust chamber.

Roger and directional

With the Roger and directional setting, adults have access to the proven benefits of directional hearing aid microphones throughout their day when using Roger. The enhanced setting will activate the directional microphone even at lower noise levels, giving adults access to their peers at softer conversational levels. In Phonak Target, the "Roger + Mic" program offers a choice of three microphone modes: omnidirectional, Real Ear Sound and an automatically activated fixed directional.

RogerReady

RogerReady makes adding a Roger receiver to a hearing aid simple and easy. Without the need for additional programming, devices with direct audio input and a Roger ear-level receiver automatically detect the signal from a Roger microphone and activate the "Roger + Mic" program.

⁶ Bor, S., Souza, P., & Wright, R. (2008) Multichannel Compression: Effects of reduced Spectral Contrast on Vowel identification. *Journal of Speech, language, and hearing Research*, 51(5), 1315-1327.

Souza, P., Wright, R., & Bor, S. (2013). Consequences of broad auditory filters for identification of multichannel-compressed vowels. *Journal of Speech, language, and hearing Research*, 55(2), 474-486.

Phonak Naída B-R RIC charging options

Phonak Charger Case RIC

The Phonak Charger Case is a charger, drying kit, and protective hard case all in one. Additionally, it includes a cleaning tool in the robust and splash-proof housing designed for two Naída B-R RIC hearing aids.

Phonak Power Pack

For charging Phonak Naída B-R RIC on the go, the Phonak Power Pack can be easily attached to the bottom of the Phonak Charger Case. It provides power for 7 full charges of two Naída B-R RIC hearing aids.

Phonak Mini Charger RIC

The Phonak Mini Charger is a compact charger for two Naída B-R RIC hearing aids.

Please refer to the technical data sheet for the Phonak Charger Case, Phonak Power Pack and Phonak Mini Charger for further information.
