

People with hearing loss are at the heart of everything we do. Our award-winning ReSound® Smart Hearing aids help people feel more involved, connected and in control. In an ever-smarter world, we think big and challenge the norm so that we can transform lives through the power of sound. Available exclusively through hearing care professionals.

ReSound is part of the GN Group – pioneering great sound from world-leading ReSound hearing aids to Jabra office headsets and sports headphones. Founded in 1869, employing over 5,000 people, and listed on NASDAQ OMX Copenhagen, GN makes life sound better.

Hear every day with clarity

Imagine having a conversation at a crowded restaurant or walking down a busy street while being able to pick up more words and sounds with more clarity than ever before. With ReSound Smart Hearing™, this is a reality.

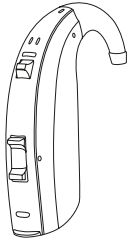

Smart hearing aids do this by combining the best available sound quality with new opportunities to connect and interact with the world around you. By adjusting to your environment, they optimize the sounds you want to hear.

With the new ReSound ENZO 3D™ hearing aids for severe-to-profound hearing loss, you will always be aware of all the sounds around you – no matter what direction the sounds are coming from.

“ This is
the first time I’ve
been extremely
excited about
hearing aid
technology

Tara Svensson, 38
ReSound ENZO 3D user

ReSound ENZO 3D™

Hear more
speech in
noise

With ReSound ENZO 3D
you get:

60%

More clarity of the
sounds around you*

60%

**Better speech
understanding**
in noise**

*compared to binaural beamforming in hearing aids for severe-to-profound hearing loss
(Effect of directional strategy on audibility of sounds in the environment for varying hearing loss severity.
Jespersen C, Kirkwood B, Groth J., 2017).
**with Binaural Directionality III compared to omni directionality
(Binaural Directionality III compared to omni directional, data on file)

“ It’s super
clear sound

Rune Lindroth, 42
ReSound ENZO 3D user

Works like wireless headphones

With Made for iPhone® technology, you can stream phone calls, music and more from your iPhone, iPad® or iPod touch® directly to your hearing aids – just like wireless stereo headphones.

And if you have an Android or any Bluetooth-enabled phone, you can still stream calls, music and more with a discreet ReSound Phone Clip+.

70%
**better speech
understanding
with FaceTime®***

Understanding speech during phone calls is 70% better with FaceTime video and voice streaming compared to a regular call, making it easier to follow phone conversations more comfortably.

Get even more out of your day with wireless accessories

Streaming sound from a range of ReSound wireless accessories lets you get even more out of your hearing experience. You can watch TV at your own volume while people around you enjoy it at their volume and hear speech more clearly in noisy environments and at a distance.

“It’s really amazing that I can stream directly to the hearing aids

Rune Linderoth, 42
ReSound ENZO 3D user

Personalize your hearing experience

The ReSound Smart 3D app lets you control your ReSound ENZO 3D hearing aids right from your phone. From the windy football field to a bustling restaurant – no matter where your day takes you, you can always be in control of how you experience the sounds around you.

Sound Enhancer

You can customize even further by adjusting volume, customizing bass/middle/treble, increasing speech focus and reducing noise and wind noise using easy sliding bars.

Geo-tag favorite locations

If you find a setting that always works for you, you can set it as a 'favorite'. You can even geo-tag it to the exact location, so you can switch right to the same settings next time you arrive at that location.

Find my hearing aids

If you can't find your hearing aids, you can see the last recorded position of your hearing aids on a map, so you know where to look for them.
