ReSound

rediscover hearing

Tinnitus: You don't have to "just live with it."

If you're reading this, you probably know first-hand what it's like to live with tinnitus.

But you may not know that:

- You're not alone. Millions of people have tinnitus.
- Tinnitus is almost always physically harmless.
- Very often, tinnitus is accompanied by hearing loss.
- Many people have found relief with ReSound Verso TS™.

Good news

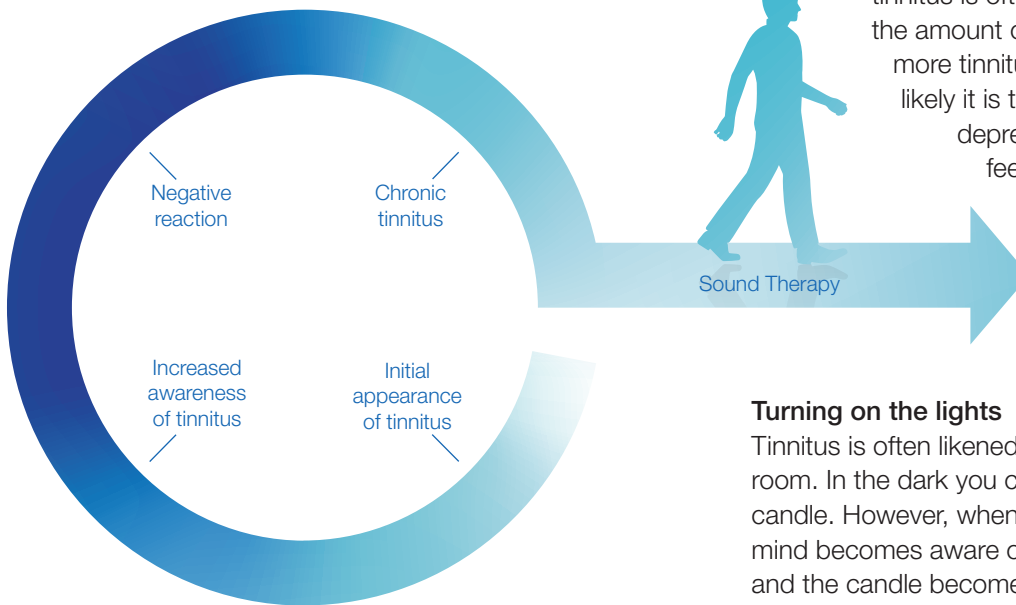

What is ReSound Verso TS?

ReSound Verso TS is our most advanced hearing aid combined with a tinnitus sound generator. It uses sound therapy to offer relief from tinnitus by diverting your attention away from it. This kind of sound therapy - together with informed counseling by a Hearing Healthcare Professional - has proven to be a highly effective way to manage tinnitus.

Breaking the vicious cycle

For some people tinnitus is just a minor distraction. But for others it is the source of severe emotional suffering.

Interestingly, the level of distress caused by tinnitus is often in direct proportion to the amount of attention you pay it. The more tinnitus weighs on you, the more likely it is to cause negative feelings like depression and frustration. These feelings in turn make you pay more attention to the tinnitus. It becomes a vicious cycle that is hard to break.

Turning on the lights

Tinnitus is often likened to a candle in a darkened room. In the dark you can see nothing but the candle. However, when you turn the lights on, your mind becomes aware of the other things in the room and the candle becomes less noticeable. This is the value of sound therapy.

Puts tinnitus in the back of your mind

Just as the candle ceases to be a focal point in a room filled with light, sound therapy helps blend tinnitus into the background so you can direct your attention away from it. The vicious cycle is broken and you experience relief.

"I need to use my ReSound TS hearing aids with the sound generator on to function. When I take them out, my tinnitus returns to its debilitating state. What a difference these instruments have made in my life. At this point I cannot live without them. Thank you!"

Ellen G., Age 65, Florida

A solution that fits your specific needs.

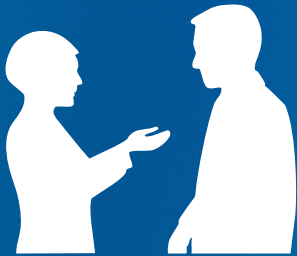

The sound generator in Verso TS produces a pleasant sound that draws your attention away from your tinnitus so it becomes less noticeable. This makes it a highly effective tool in dealing with your tinnitus.

However, many people with tinnitus also have hearing loss. In cases like these, Verso TS combines a high performance hearing aid with a sound generator to manage tinnitus and improve hearing.

And because each case of tinnitus is unique, Verso TS allows your Hearing Healthcare Professional to program the sound generator to relieve your specific symptoms.

What to expect when you visit your Hearing Healthcare Professional

Step 1

Tinnitus consultation and counseling.

- Symptoms and concerns
- Evaluation of hearing/tinnitus
- Treatment options

Step 2

Fitting with Resound Verso TS.

- Introduction of sound therapy
- Personalization of sound therapy
- Initial support and counseling

Step 3

Follow-up visits.

- Review and assessment
- Adjustments
- Continued support and counseling

You're an important part of the solution.

Verso TS can bring relief from tinnitus but it doesn't always happen overnight. For best results, you and your Hearing Healthcare Professional will work together over a period of time to help you fully acclimate to your new Verso TS hearing aids and learn additional ways to manage your tinnitus.

With Verso TS, patience, and continued support from your Hearing Healthcare Professional you will be able to manage your tinnitus and experience long-term relief.

ReSound Verso TS colors

The ReSound Verso TS family

ReSound Verso TS comes in a variety of models and colors to suit your individual needs and preferences.

The ReSound Unite™ Mini Microphone

The versatile Mini Microphone is a wireless clip-on device that streams sounds from TVs, computers, mobile phones, MP3 players, and other audio sources directly into your hearing aids – without wires, additional devices and hassle.

With the Mini Microphone, you can use virtually any sound signal to help relieve your tinnitus at any time and in any place.

If you suspect you have tinnitus or you have questions about Verso TS, we recommend you contact a Hearing Healthcare Professional who is qualified and experienced in tinnitus management.
