Oticon Wax Filter Guide

A Streamlined Wax Protection System

The ProWax and ProWax miniFit wax systems are all you need to protect your patient's RISE 2 and Inium hearing devices. These two systems replace NoWax and Wax Stop systems for all receivers, custom products and all ear molds.

Pro Wax and ProWax miniFit offer proven benefits to the longevity of the hearing device:

- Nano coating - repels moisture
- Redesigned flange system - prevents wax from reaching the receiver tip
- New flange design - removes existing wax each time the Prowax is changed – eliminates old wax build up
- Better acoustic performance
- Reduced repairs

At Oticon, our goal is to make fitting hearing devices as easy as possible. We have created this guide to better acquaint you with the tools that you will need for working with our hearing instruments.

Oticon is committed to providing the highest quality products, service and support for you and your patients.

Product families	Ear piece type	 ProWax	 ProWax miniFit
 Alta	miniFit Receivers (60, 85, 100)		
	miniFit LiteTip and miniFit Micro Mold		
	Power Receiver Mold		
	CIC, ITC, HS,FS		
 Agil Acto Ino Intiga	S,M and Intiga Receivers		
	Micro Mold		Wax Stop
	Power Receiver		Wax Stop
	Power Mold (interchangeable receiver)		
	Intiga ⁱ		
	CIC, ITC, HS, FS		

ProWax and **ProWax miniFit** are new, nano coated wax filters for ear pieces, providing better protection for longer performance. **ProWax** can be used with all Oticon products and ear pieces where **NoWax** filters were previously used.

ProWax and ProWax miniFit are trademarks of Oticon.
